## How are the School Climate Indicators Calculated?

The school climate indicators provide school-level descriptions of several factors that are known to influence learning success in schools. All subdomains except “Low Violence Victimization” are calculated by averaging the percentage of respondents who report “Yes, most of the time” or “Yes, all of the time” on survey items that comprise each scale. “Low Violence Victimization” is computed by averaging the percentage of respondents who report “No, never” on the survey items that comprise the scale. A value of 60 on the “School Connectedness” indicator, for example, means that on average, students report “Yes, most of the time” or “Yes, all of the time” on three of the five “School Connectedness” survey items (5 multiplied by 60 percent).

Results are based on responses from 5th grade students on the California Healthy Kids Survey. Student results are not included if less than 50% of students or less than 15 respondents provided data.

For the 2020-21 school year, results on student indicators that are only applicable to the In-school or Hybrid instructional models are reported if at least 10% of the respondents have indicated that they

attended school in person or participated in hybrid classes. These results should be interpreted cautiously if few students attended school in person when the survey was administered.

Further information about the methodology used to construct the school climate indicators can be obtained by contacting Cindy Zheng at 562-799-5481 or [czheng@wested.org](mailto:czheng@wested.org).

## Explanation of Other Indicators

Results are provided on selected key student- and staff-reported school climate items as a complement to the school climate indicators. Staff indicators are provided to facilitate comparisons between student and staff perceptions. While most staff indicators are in the high range (80-100%), it is important to compare how staff perceptions might differ from students to identify areas for improvements.

Staff results are not included if less than 50% of staff or less than five staff members provided data. Student- and staff-reported school climate measures and their sources are described below.

### Selected Student-Reported School Climate Measures (CHKS)

- Finish all school assignments – finish all your school assignments “most of the time” or “all of the time.”
